Business Understanding

Business Understanding

The ability to identify emotion from social media can be very beneficial for companies displaying products at different conventions

Data Source

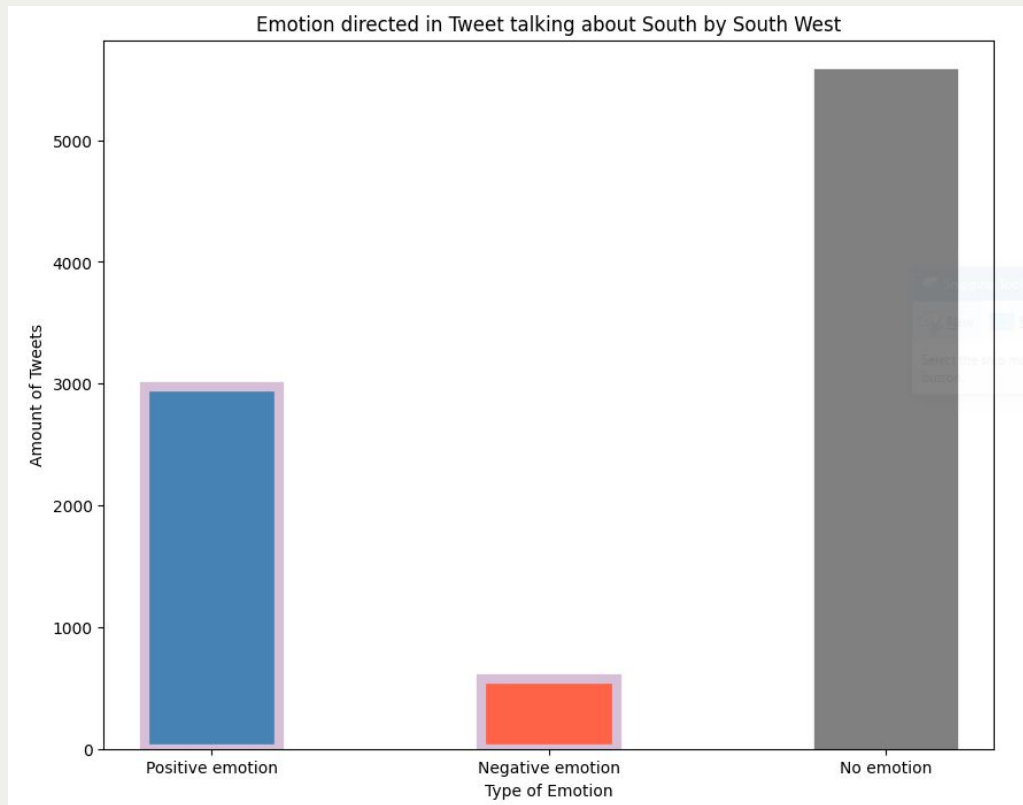

Data Sourced from tweets made in reference to a past SXSW

- Tweets were found if they included SXSW and an Apple or Google product
- Contributors manually evaluated tweets about different brands and products
- They were asked to decide if the tweet expressed positive, negative or no emotion
- If some emotion was expressed, they were asked to say which brand and product

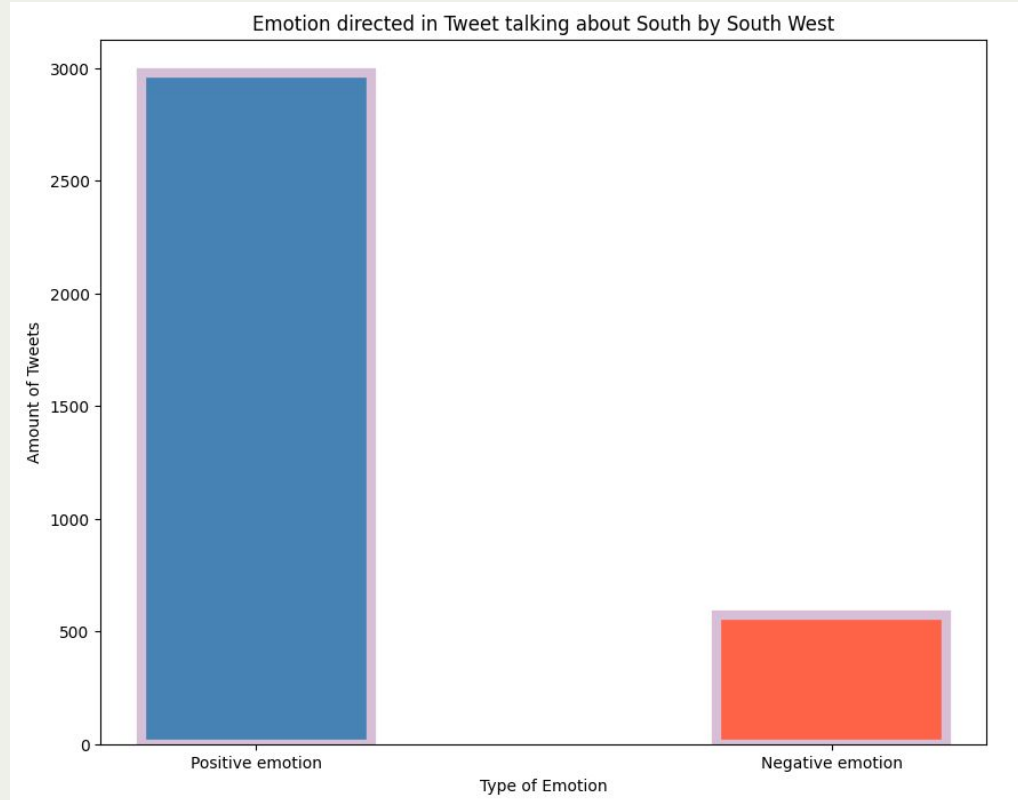

Data Source

Data Understanding

Spread of Tweets

High Number of Positive Tweets

Data Analysis

Positive Words

Negative Words

Model Performance

- 32% of Positive Tweets
- 16% of Negative Tweets

Positive Rates per Tweets

Results

Results

One

Identified different words
to signify emotion

Two

Successful recall score for
positive/negative tweets

Three

Android tweets had the
most positive sentiment

Further Steps

Further Steps

- See what business practices corresponds with types of tweets
- Look at more than one social media and other conventions/events
- Look into no emotion tweets and research how to convert them to positive ones

Thanks!
